

# Kick Soccer

Kick Soccer is actually a “safety practice drill” packaged up in a game format! Put the object ball against one end-rail, and the cue ball on the far end-rail and score!

Kick your object ball (Player 1 is 1-ball, Player 2 is 2-ball) into the opponent’s Goal to score a point, or carom the cue ball into your own goal (defending the goal) for a point. Even better, do both on the same shot and earn two points!

If you don’t hit your object ball, or scratch, or hit the opponent’s ball first, it is an opponent free kick from one of the free kick zones (move the cue ball to one of the 2 free kick zones for your player).

Re-spot balls after any point is made.
